INNOVATORS SINCE 1906

KGS
Swiss Diamond Technology®

KGS FLEXIS® PADS

KGS FLEXIS® technology for floor cleaning and maintenance combines high quality materials, science, practical experience and the spirit of “Swiss Diamond Technology®”, delivering the very best solutions for customers.

KGS engineers have worked with the world leaders in non-woven fibre technology to create a revolutionary cleaning pad material that provides the optimum balance of strength, durability and softness. The strength & durability of this material gives a very long lifetime under a broad range of working conditions. These qualities also allow the consumer to “push” the pad aggressively, working faster than normal, saving time & money. The “density” of the pad delivers an ingenious balance that maximises cleaning performance while bringing an unmatched shine to most floor surfaces.

In addition, KGS scientists have incorporated proprietary abrasive technology normally applied in the aerospace industry for high precision surface finishing. The result of using this KGS diamond abrasive technology is superior polishing characteristics, fast removal of soils, long lifetime and repeatable performance.

The KGS Floor team has worked endless hours with customers in every part of the world to understand the demands in today’s cleaning industry. The KGS FLEXIS® system has cleaned millions of square metres of shopping malls, airports, hospitals, government buildings, schools, grocery stores, large home improvement, retail store chains and every other type of commercial space. KGS brings together the very best materials and science to provide superior results on every floor.

KGS FLEXIS® pads are available in a wide range of sizes in round and rectangular formats for use on single disc machine, autoscrubbers / scrubber dryers and high speed burnishers.

The KGS FLEXIS® HD thin pads were developed for use on oscillating head, high energy machines where the cleaning and polishing action requires a dense material to minimize energy absorption by the pad. This can be a problem with the thicker non-woven pad material.

KGS FLEXIS® DIAMOND IMPREGNATED FLOOR PADS (DIP)

KGS FLEXIS® floor pads are designed, engineered and tested for the very best results. Make your cleaning & maintenance work easier. The floor pads are available in eight different grit sizes. Grit 400, 800, 1500 and 3000 are part of the standard line, a four step system for cleaning and maintenance.
These pads are the ultimate solution on daily floor cleaning and polishing due to their unique technical properties.

The KGS FLEXIS® standard 4 pad system will handle the regular maintenance and cleaning of most floors. However, for special needs, there are pads available in grits, 100, 200, 350 and 8000. Grit 100, 200 and 350 are coarse pads that can be used before the four step system. Grit 8000 is ultra fine and perfect to use after the four step system for a highly reflective polish.

- Thick and strong 20 mm / 0.8” pads, consistent finish in all surfaces
- Proven long lasting results
- Terrazzo, marble, concrete, porcelain, vinyl, plastic, linoleum, epoxy and acrylic floors

HIGH SPEED BURNISHING

FLEXIS DIAMOND PADS ARE IDEAL FOR HIGH SPEED POLISHING APPLICATIONS

SCRUBBER DRYER

LOW SPEED CLEANING AND MAINTENANCE

CLEANING & POLISHING PADS

KGS DIAMOND offers the special KGS FLEXIS® and KGS FLEXIS® HD pads for floor cleaning and maintenance.

Can be used on floors including concrete, marble, terrazzo, porcelain, vinyl, linoleum etc.

STANDARD GRITS

Step 1 - Red pad, coarse grit 400

The red pad is mainly used for heavy duty surface cleaning. It is intended for deep cleaning and as a base to establish a good starting point for the 4 step.

- Rough or very dirty surfaces
- Process starter / Occasional use
- Mostly used for “mat finish” floors

Step 2 - Blue pad, medium grit 800

The blue pad can be used for deep cleaning and produces an economical light refl ective finish, most popular in large industrial and commercial applications.

- Very high traffic floors, dusty areas
- Mostly used on “mat finish” floors
- Occasional deep cleaning / Daily for light gloss

Step 3 - Yellow pad, fine grit 1500

The yellow pad is intended for both daily polishing and cleaning, produces a clear reflective shine.

- All floors / Maintenance
- Regular finish / Daily for high-gloss

Step 4 - Green pad, very fine grit 3000

The green pad, used wet or dry, is the final pad in the four step process leaving a polish to your floor with a highly reflective shine. Daily use will maintain and improve the polish.

- All floors / Cleaning / Buff
- Daily for cleaning / Extra high-gloss

SPECIAL GRITS

Black pad, aggressive grit 100

The most aggressive pad in the range. This pad is used specifically in conjunction with appropriate chemical solution for extreme heavy-duty cleaning of heavily soiled floors with grease and oil, mineral or rubberized deposits.

Orange pad, very coarse grit 200

This pad is also intended for heavy duty cleaning where the extent of soiling does not require the aggressive black pad. Frequently used for surface cleanup of residual grout and filler on honed travertine floors with just plain water. Use with a degreaser solution on surfaces soiled with grease and oil.

Brown pad, coarse plus grit 350

A heavy-duty cleaning pad for soiled surfaces where the red pad does not have enough cutting power. Can be used for removing very light polymer coatings, however, an appropriate stripper may be required to break down the polymer structure to facilitate total removal. The pad material may not be compatible with some chemical strippers. Always test for compatibility prior to widespread use.

Cream pad, ultra fine grit 8000

The cream 8000 pad for buffing wet or dry. Gives the surface a deep polish shine also called “Wet Look Shine”. If it is used daily, in combination or without the KGS DIAMOND green pad, it will maintain and improve the deep polish shine.

CHOOSE THE RIGHT PAD FOR YOUR FLOOR

FLOOR TYPE	CAUTIONARY NOTES	GRITS
Limestone indoor	**Heavy** traffic wear	400 800 1500
Limestone indoor	**Light** traffic wear	800 1500
Limestone outdoor	All conditions	400 800
Marble honed	**Medium** light reflection required	800 1500
Marble polished	**High** light reflection required	1500 3000 8000
Granite textured and honed	Cleaning only	400 800
Granite polished	Not for floor restoration	1500 3000 8000
Basalt	Honed surface	400 800 1500
Hard slate	Deep clean to honed finish	400 800 1500
Soft slate	Do not use coarse floor pads	1500 3000
Epoxy terrazzo	Do not use coarse floor pads	1500 3000 8000
Cementitious terrazzo	Do not use coarse floor pads	800 1500 3000 8000
Engineered stone	Do not use coarse floor pads	1500 3000 8000
Porcelain / Glazed ceramic title	Use caution on this material	3000 8000
Matt porcelain title	Do not use on polished porcelain	800 1500
Epoxy coatings	Do not use coarse floor pads	1500 3000 8000
Linoleum / Marmoleum	Do not use coarse floor pads	1500 3000 8000
Vinyl / Plastic	Do not use coarse floor pads	1500 3000 8000
Trowelled concrete	Use caution on this material	400 800 1500
Polished concrete	Do not use coarse floor pads	1500 3000 8000

Note: This table is the suggested pad sequence for various flooring materials. When in doubt, always start with a finer grit than suggested but if cleaning or honing progress is too slow, move progressively coarser until the desired result is achieved. A high polish is achieved with the 3000g pad. The 8000g pad is optional for a higher level of polish. Test in an inconspicuous area for suitability prior to widespread use if in doubt.

Caution: Do not use grits below 800 on polished materials as this will seriously damage the polish.

QUICK TIPS

- Remove dirt and dust first by using high / medium water flow on a scrubber drier using the first required grit.
- Test in an out of the way area **before** beginning the full job. **An area that is easily controled.**
- KGS FLEXIS® pads do not require heavy duty chemicals to work.
- Beware of sharp protrusions in the floor (i.e. metal strip or sharp lippage).
- Make sure you place the pad wording up against the machine.
- Use flat Velcro style drive boards to maximize floor contact. This delivers a more even floor finish.
- Wash pads daily

DAILY **MAINTENANCE** PAD

EXCEPTIONAL GLOSS MAINTENANCE

KGS FLEXIS®
THE PLATINUM PAD

THE FLOOR MAINTENANCE REVOLUTION

Experience the ultimate simplicity in floor maintenance with the KGS FLEXIS® Platinum Pad. Achieve a brilliant, high-gloss finish in just one step using only water — no chemicals, no multi-step process. Designed for maximum efficiency and long-lasting performance, the Platinum Pad delivers professional results with minimal effort.

Benefits

- Straightforward application for easy understanding
- No pad changes, reducing application time
- Reliable durability and performance
- No chemicals required, just use water
- Environmentally friendly solution

KGS ENDURO™ PADS

KGS ENDURO™ DRY polishing pad:
Dry floor grinding and polishing pad under planetary machines and high speed burnishers.
A pad with natural fiber pad base assists for dry grinding and polishing concrete and concrete related surfaces like overlays and terrazzo.
The process generates moderate heat that helps the polishing process and curing of certain floor coating. KGS ENDURO™ the most unique and respected floor grinding and polishing pad in the world.

Benefits

- Grinding through to polishing
- Engineered to be durable and fast
- Exceptional life
- Low tooling cost per m2
- Scratch removal on hard finished surfaces
- Natural fibers to produce a high gloss and maintaining that wet look finish.

Product specifications

⌀ in inches 6, 7, 8, 9, 10, 11, 12 & 13.

⌀ in mm 152, 178, 203, 229, 254, 279, 305 & 330.

KGS FLEXIS® HD
DIAMOND FLOOR PADS & SHEETS

KGS DIAMOND has developed a completely new range of its revolutionary KGS FLEXIS® sheets with KGS diamond abrasive technology. The sheets are specifically designed for “high energy” oscillating floor machines and cleaning equipment.
This new KGS technology is based on decades of precision polishing in the most demanding industries, where KGS products are world leaders in performance.

The KGS FLEXIS® HD sheets will bring the absolute highest performance from any “high energy” oscillating floor machine. The KGS FLEXIS® HD system is easy to use, extremely versatile and will save you money. Using your rectangular floor cleaning equipment, you can clean, maintain and polish concrete, terrazzo and soft natural stone floors.

This special KGS diamond abrasive technology works wet or dry, at high or low speeds, with heavy or light equipment.

KGS FLEXIS® HD DIAMOND FLOOR PADS

Pads and sheets

KGS FLEXIS® pads are the ultimate solution on daily floor cleaning and polishing due to their unique technical properties. Superior performance compared to standard non woven pads on oscillating machines. Key Benefits are long life and works twice as fast as the competition. You need in general only 5 passes per grit, with these thin (**10 mm**) but very strong pads and their open weave pattern. Available in round and rectangular shape.

Key Benefits

- Long life
- Works twice as fast as the competition
- Only 5 passes per grit
- **10 mm** thick pad
- Open weave
- EU manufactured

Working Benefits

- No need to protect large areas when working
- Easy to use reducing cleaning times
- More efficient than standard nonwoven pads
- No special skills required

Floor Types

- Terrazzo
- Marble
- Granite
- Concrete
- Porcelain
- Vinyl
- Plastic
- Linoleum
- Epoxy
- Acrylic

KGS FLEXIS® HD easily maintains concrete, terrazzo and stone surfaces using only water. Exceptional productivity gains, with long life and high shine. Fewer pad changes means fewer stoppages, less downtime and long life results with less overheads. When cleaning or maintaining your floor, you become responsible for its safety and usage. You keep the risk under control while improving the general look of your floors.

Available grits

- 100 **Aggressive**, grit 100 (black)
- 200 **Very Coarse**, grit 200 (orange)
- 350 **Coarse plus**, grit 350 (brown)
- 400 **Coarse**, grit 400 (red)
- 800 **Medium**, grit 800 (blue)
- 1500 **Fine**, 1500 (yellow)
- 3000 **Very fine**, grit 3000 (green)
- 8000 **Ultra fine**, grit (cream)

From rough to fine

KGS FLEXIS® HD

Discs have been developed for various light renovation and polishing activities. The polishing discs are suitable for the renovation, deep cleaning, and polishing of natural stone, engineered stone, porcelain, and concrete.

The KGS FLEXIS® HD pads remove light scratches, damage, wear and stubborn dirt from kitchen worktops, window sills, interior work, and exterior stone. The surface regains its natural gloss.

Benefits

- Perfect for maintenance and repair work
- Very good for adding an extra finishing touch and extra gloss to the product

KGS ROCKY

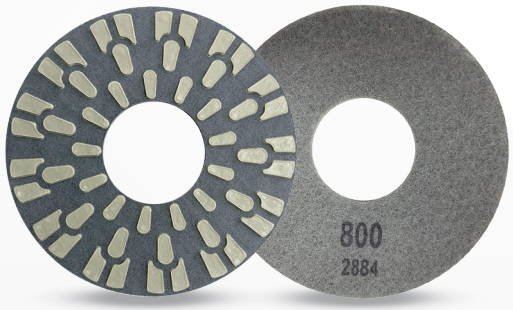

Overlay polishing pad system

KGS ROCKY dry polishing discs are ideal for restoring or polishing high polymer overlays and worn previously polished floors dulled by heavy traffic. Suitable for cement and resin-based monolithic floors, they deliver a fast, orange-peel-free finish even on uneven surfaces.

Built for heavy grinders at maximum speed, they can be used from grit 60 to 3000, achieving excellent results at a normal walking speed. The discs feature abrasive resin segments bonded to a flexible backer, attached to a non-woven pad, easily mounted with harpoon hook drivers or optional spacers.

KGS ROCKY ensures a high-gloss, clear polish in record time—usually in a single pass—at normal walking speed with no colour transfer to the surface.

TERRAZZO CONCRETE

NOW AVAILABLE IN **13 INCHES**

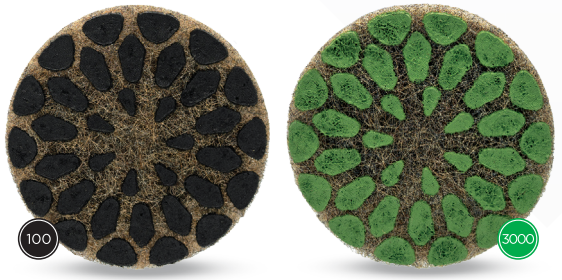

KGS OLED HH PADS

Cream polishing pad system

The KGS OLED HH system is available in the grits 60, 100, 200, 400, 800, 1500 and 3000. The pads provide an efficient solution for light-duty honing and polishing of concrete cream with minimal aggregate exposure. OLED HH pads are the perfect solution for renovating polish on lightly worn and dulled previously polished concrete.

Benefits

- Dry polishing system
- Very long service life
- Ideal for light renovation and polishing
- Produces less orange peel effect than normal diamond pads
- Economical and easy to use
- Exceptional results on concrete, cement and epoxy-based terrazzo.

KGS WET SEKTOR TOOLS

KGS WET SEKTOR is designed to help floor restoration professionals achieve exceptional clarity, depth, and gloss in less time. Engineered for consistent performance and outstanding finish quality, it delivers fast, efficient polishing while maintaining excellent control throughout the process. The result is a premium surface appearance with brilliant shine and lasting visual impact—making KGS WET SEKTOR the smart choice for contractors who demand productivity, reliability, and superior results.

Fiber and hogs hair pads are available in a variety of diameters.

- Achieve a superior polish faster, with remarkable clarity and shine.
- Maximize productivity without compromising finish quality.
- Trusted by professionals for consistent, high-value results on every project.
- Enhances the visual appeal and long-term value of restored surfaces.

KGS SPEEDLINE® FL4

Resin-bonded diamond disc

KGS Speedline® FL4 are sintered resin-bonded, velcro-backed flexible diamond polishing pads designed for the consistent grinding and polishing of natural stone flooring. Engineered for single-head floor machines, they feature a unique block-shaped pattern that ensures efficient stock removal, resulting in a higher gloss finish. The KGS Speedline® FL4 product has gained recognition among floor restoration specialists for its performance and competitive pricing.

- Consistent finish on most of the floor surfaces.
- Economical with very good price-performance ratio.
- High stock removal.

SAFETY

Always read the safety instructions

Abrasive products improperly used can be very dangerous.

- Always follow the instructions provided on the product and by the machine supplier.
- Ensure that the abrasive product is suitable for its intended use. Always examine all products for damage when re-using or defects upon first use.
- Follow the correct procedures for handling and storage of the products.

Be aware of the hazards likely during the use of abrasive products and observe the recommended precautions to be taken.

- Bodily contact with the abrasive product at operating speed
- Injury resulting from product breakage during use
- Grinding debris, sparks, fumes and dust generated by the grinding process
- Noise / vibration

Please refer to the relevant EN standard for detailed information.

- EN12413 for Bonded Abrasives
- EN13236 for Superabrasives
- EN13743 for Specific Coated Abrasives

Never use a machine that is not in good working condition or one with defective parts. Employers should carry out a risk assessment on all individual abrasive processes to determine the necessary protective measures. They should ensure that their employees are suitably trained to carry out their duties.

Work safe

- Read the user guide carefully (ISO 7010)
- Wear eye protection (ISO 7010)
- Wear a mask (ISO 7010)
- Wear hearing protection (ISO 7010)
- Wear gloves and necessary protective clothing (ISO 7010)
- Wear safety shoes (ISO 7010)
- Always take into consideration the correct provided working indications as wet, dry or hybrid tools.
