MIRKA

Mirka AbraClean

The smarter way to remove sanding dust

AbraClean is a patent-pending cleaning pad that easily removes fine sanding dust from surfaces, helping ensure optimal paint adhesion and a high-quality finish.

Cloths that are traditionally used in surface preparation fail to fully remove small particles and can leave behind residues. AbraClean offers complete dry dust removal. Simply attach AbraClean to a manual or power sander with dust extraction and sweep it over the sanded surface. Cleaning surfaces with the sanding tool speeds up the surface finishing process considerably.

AbraClean – Turn Your Sander Into a Cleaning Tool

Key Features

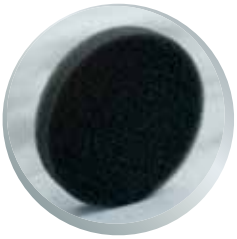

Effectively removes dust after sanding and before painting or coating, and is suitable for all types of chemical-free dry cleaning of sanded surfaces.

No greasing or smearing, ensures a clean, paint-ready surface.

Ideal for vehicle sanding, manufacturing and refinishing, woodworking, composite processing and marine industry applications.

Reusable and washable with water, reducing waste and costs.

Compatible with Mirka® DEROS II 650 and Mirka® AIROS 650S for streamlined workflows.
